
PROPOSAL FOR THE NAPE LEADERSHIP TEAM

Executive Leadership Experience Platform

Members-only access, hosting, fixes, and administrator technical support — options for 1-, 2-, and 3-year terms.

Draft for review

1 Summary

NAPE wants the Executive Leadership Experience curriculum available only to members, through a Clerk membership login. This is achievable. It also changes the platform from a **prototype with no accounts** into a **member service that holds sign-in data**, and that change drives the hosting, support, and compliance work in this proposal.

We offer three service packages, each on a 1-, 2-, or 3-year term. Longer terms lower the effective annual cost and lock pricing.

A. Essentials

For a capable administrator and a stable, secure site.

Hosting, monitoring, security patching, member-login gating, bug fixes.

RECOMMENDED

B. Standard

Steady improvement and a supported administrator.

Everything in A, plus a monthly enhancement allowance, admin training, and office hours.

C. Partner

A fully managed program with a defined service level.

Everything in B, plus priority response, quarterly reviews, analytics reporting, and roadmap planning.

2 Where the platform stands today

- Multi-page site deployed on Vercel, with five small serverless functions connected to Airtable (interest form, feedback, partner connections, partner directory, published-media notes).
- **No user accounts.** Member goals, reflections, and stage are stored in each person's own browser and never reach a server. The Privacy Notice says so.
- Pages are open to anyone with the link. Prototype banner, Terms, and Privacy pages are in place; a NAPE contact email and counsel review of the legal wording are still open.
- Automated browser checks run on every change.

3 Scope: three workstreams

Workstream 1 — Hosting & operations

- Production hosting, custom domain, TLS, DNS management
- Preview and production deployments with rollback
- Uptime and error monitoring with alerts to a named contact
- Security and dependency patching on a defined schedule
- Secrets managed outside the code; tokens rotated on schedule
- Scheduled data backups and an annual restore test

Workstream 2 — Fix requested items

- One intake channel; each item triaged as **Bug**, **Change**, or **New feature**
- Bugs are always covered. Changes and features draw from the package allowance
- Known pre-launch items: NAPE contact email on legal pages, counsel review of Privacy and Terms, prototype banner wording
- NAPE's requested-fixes list: [list items with priority: Must / Should / Could]

Workstream 3 — Administrator technical support

- Named support channel with response targets by severity
- Administrator onboarding: inviting and deactivating members, resetting access, editing Airtable-managed content
- Written runbook for common tasks and “what to do if...” situations
- Office hours; NAPE's administrator is first line, we are second line

4 Membership gating: what it takes

Assumptions (please confirm). (1) NAPE decides who is a member, by roster, dues status, or approval. (2) “Curriculum” means the framework explorer, assessment, resource library, and tools; home, privacy, and terms stay public. (3) Membership is in the hundreds to low thousands.

Recommended approach

- Clerk provides sign-in and sessions. Membership status is stored on the Clerk user and set by the NAPE administrator or synced from NAPE's roster.
- **Access is enforced on the server, not only in the browser.** Because the site is made of static pages, a browser-only check can be bypassed by requesting a page directly. The check runs before protected pages and member-only API routes are served.
- Sign-in and sign-out in the navigation, plus a “membership required” page for signed-in non-members.

Decisions for NAPE

#	Decision	Options	Effect
1	How do people become members?	(a) Administrator invites or approves; (b) self-signup with roster or email-domain check; (c) paid dues via Clerk Billing or NAPE's system	(a) simplest; (c) most automated, most integration work
2	Where does membership truth live?	Clerk only, or NAPE's membership system with sync	Sync adds build and support
3	What happens to progress data?	(a) Stays on the device as today; (b) moves to accounts so it follows the member	(b) is a better experience but means member reflections are held on a server; needs privacy and legal review
4	Who is the administrator?	One person or a small team; Clerk dashboard vs. in-app admin screen	Drives training and permissions
5	Existing users	Grandfather current contacts or require re-registration	Affects onboarding communications

Clerk, Vercel, and Airtable are billed by those vendors. Their pricing and plan limits change; current figures will be confirmed with each vendor before the final quote.

5 Package comparison

	A. Essentials	B. Standard	C. Partner
Hosting, monitoring, patching, backups	Included	Included	Included
Clerk gating: initial build	One-time fee	One-time fee	One-time fee
Ongoing access maintenance	Included	Included	Included
Bug fixes	Included	Included	Included, priority
Change / enhancement allowance	Quoted separately	[] hrs / month	[] hrs / month
Administrator support	Email	Email	Email + phone for urgent
Office hours	On request	Monthly	Twice monthly
Training & runbook	Initial session	Initial + annual refresher	Initial + semiannual
Security / uptime report	Annual	Quarterly	Quarterly + incident reviews
Aggregate usage analytics	—	Annual	Quarterly
Roadmap & planning session	—	Annual	Quarterly
Compliance support	Annual check	Annual + on change	Annual + on change + counsel coordination
Response: urgent (site down, login broken)	1 business day	4 business hours	2 business hours
Response: normal	3 business days	2 business days	1 business day
Monthly service fee	[\$]	[\$]	[\$]

6 Term options

	1 year	2 years	3 years
Commitment	Lowest	Moderate	Highest
Price protection	Reviewed at renewal	Rate held for term	Rate held for term
Term discount	None	[]%	[]%
Payment	Annual or quarterly	Annual or quarterly	Annual or quarterly
Best when	NAPE wants to test gating first	Board approves a two-cycle budget	NAPE wants stability across leadership transitions
Exit	Non-renewal, 90 days' notice	Termination for convenience, [] days' notice, prorated handoff fee	

Handoff package (every term). Repository and documentation transfer, credential rotation, runbook, and a knowledge-transfer session, so NAPE is never locked in. We recommend NAPE own the Clerk, Vercel, Airtable, and domain accounts directly, with us as an administrator.

7 Timeline and rollout

Weeks 1–2 • Kickoff. Confirm the five decisions, list requested fixes, name the administrator, confirm account ownership.

Weeks 2–5 • Gating build. Clerk setup, server-side protection, membership roles, sign-in and non-member pages, admin invite flow, updated tests.

Weeks 3–6 • Compliance (parallel). Privacy Notice and Terms updated for accounts, contact email added, counsel review.

Weeks 6–8 • Pilot. Small member group and the administrator; issues fixed.

Weeks 8–10 • Launch. Member announcement, administrator training complete, monitoring live.

Then • Steady state. Chosen package begins; first review at 90 days.

Timeline is an estimate and depends on how quickly NAPE settles the decisions and reviews legal text. Safeguards: the gate can be switched off if login fails, the current public site stays up until the pilot is approved, and a rollback plan is written before launch.

8 Risks and how we address them

Risk	Mitigation
Browser-only gating can be bypassed	Server-side enforcement
Member data now includes sign-in identity	Minimize data, update Privacy Notice, counsel review, least-privilege access
Single administrator becomes a bottleneck	Runbook, named backup, training refreshers
Vendor pricing or plan changes	Clear pass-through costs, annual vendor review, advance notice
Scope creep on requested fixes	Bug / change / feature triage; allowance reported monthly
Progress lost when members change devices	Decision 3: clear communication, or move progress to accounts
Legal review delays launch	Start compliance work at kickoff

9 What we need from NAPE

1. Decisions 1–5 in section 4
2. A named administrator and a backup
3. The requested-fixes list with priorities
4. Administrator access to the domain, Vercel, Clerk, and Airtable accounts
5. A contact for legal and privacy review
6. A membership roster or process for granting access

10 Next steps

1. Leadership reviews the packages and terms and indicates a preferred package and term, or requests changes.
2. 45-minute kickoff call to settle the section 4 decisions.
3. We return a final quote and statement of work within [] business days.
4. Sign and begin the gating build.

This document is a planning proposal, not legal advice. Privacy, membership terms, and the handling of member reflections should be reviewed by NAPE's counsel. Vendor prices and features are subject to change.
